## WILL BEND YOUR PRODUCTIVITY UPWARDS!

- ✓ Excellent straightening and accurate feeding without re-bar marking due to multiple roller feeding.
- ✓ The lower rollers of the straightening sub-assemblies are powered, thus creating a positive, precise and evenly distributed feeding force.
- ✓ Diameter changes can be completed in seconds, thanks to the "Hexagon Shaft Pre-setting System"
- ✓ Adjustable counter-torsion (anti-twist) system always produces flat shapes regardless of re-bar quality and axial twist (patent).
