

THE BC SERIES

AUTOMATIC MULTI-ROD MEASURING AND CUTTING MACHINES

WITH BAR
UNIQUE
ALIGNING
SYSTEM

- ✓ The **BCM and BCF series** are heavy duty re-bar measuring and cutting machines.
- ✓ BC re-bar cutters are available in two types, Fixed (BCF) or mobile (BCM).
- ✓ BC re-bar cutters are available in three diameter ranges capable of processing 26, 32 and 40 mm (#8 #11 #14) rebar.
- ✓ Capable of processing up to ten re-bars -of the same diameter- simultaneously.
- ✓ The machine can be supplied with laterally shifting of either the measuring and cutting head or of the re-bar feeding-storage unit.
- ✓ Fast and easy loading of re-bars.

- ✓ Automatic feeding, measuring, cutting and separation of the cut to length re-bars.
- ✓ The machine can be supplied with two or three powered roller discharge conveyors / bins for easy transfer of cut to-length bars.
- ✓ Hydraulically shearing unit with easily changeable cutting blades providing eight different cutting sides before replacement.
- ✓ Excellent accuracy via rotary encoder length measurement.
- ✓ Industrial microprocessor control with user friendly programming.

Available with:

- ✓ Automatic multi-bar aligning system, activated before the feeding and measuring operations.
- ✓ Sound proof measuring channel and roller conveyor insulation.
- ✓ The BC cutting machines can be combined with the BENDOMAT twin head benders.
