

RE-BAR BENDING MACHINES

B-ST and B-HD SERIES

- The B-ST and B-HD SERIES are heavy duty re-bar bending machines for continuous operation within the reinforcing industry.
- The machines are easy to operate and maintenance free.
- The bending machines are equipped as standard with three operation modes (Automatic, Step mode and Continuous operation)
- Easy selection of clockwise or counter clockwise bending direction.

B-HD SERIES

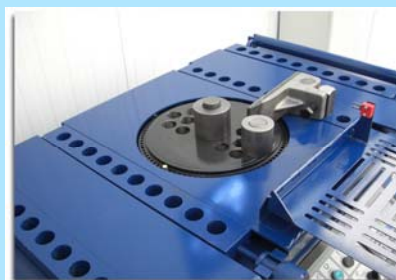

- The bending machines are suitable for Cut & Bend Plants as well as construction sites.
- The **B-HD** series are equipped as standard with Computer angle selector and four adjustable pinhole saddles ensuring precise setting of bending angles.
- The **B-ST** series are equipped as standard with Pin control and angle selector switch (Computer angle selector can be fitted as an option) and with two adjustable pinhole saddles.

B-ST SERIES

B-HD SERIES
With spiral equipment

B-HD SERIES
With four adjustable saddles

B-ST SERIES
With big radius bending fittings

RE-BAR BENDING MACHINES

B-T and B-LT SERIES

B-LT SERIES

B-T SERIES

B-LT SERIES

B-T SERIES

- The **B-LT** series are equipped as standard with Pin bending control and two adjustable pinhole saddles ensuring precise setting of bending angles.
- The **B-T** series are specially designed for on-site work and are fast and simple to operate.
